These operations are often carried out by the units that extracted the resource and/or others located nearby.	Mining/Quarrying
3	C1000	Manufacturing includes the physical or chemical transformation of materials, substances, or components into new products, although this cannot be used as the single universal criterion for defining manufacturing (see remark on processing of waste below). The materials, substances, or components transformed are raw materials that are products of agriculture, forestry, fishing, mining or quarrying as well as products of other manufacturing activities. Substantial alteration, renovation or reconstruction of goods is generally considered to be manufacturing. This section includes manufacture of food products, beverages, tobacco products, textile, wearing apparel, leather, wood and products of wood and cork (except furniture), articles of straw and plaiting materials, paper and paper products, printing and reproduction of recorded media, coke and refined petroleum products, chemicals and chemical products, basic pharmaceutical products and pharmaceutical properties, rubber and plastic products, other non-metallic mineral product, basic metal, fabricated metal products, except machinery and equipment, computer, electronic and optical products, electrical equipment, machinery and equipment n.e.c., motor vehicles trailers and semi-trailers, other transport equipment, other manufacturing, repair and installation of machinery and equipment.
